Community Development to Fight Poverty in Central African Republic

WWW.FSD.CH

According to UNOCHA, 2.6 million people living in the Central African Republic (CAR) are currently in need of humanitarian assistance. Up to now, the Covid-19 pandemic has not exploded as in the developed world, however it has further exacerbated the vulnerabilities of the most marginalised communities. FSD is already engaging in peace-building activities in CAR and in parallel runs complimentary projects that enhance basic living conditions of rural communities.

71% of the population is living below the international poverty line

EMPLOYMENT OPPORTUNITIES

EDUCATION

Children constitute, together with women, the most vulnerable part of the population. Since education is one of the most important means to enhance a child's well-being and future chances, **FSD will target childrens' access to schools and kindergarten.**

WOMEN EMPOWERMENT

FSD supports the Londo Mo Louti community centre in the north west city of Bouar which aims to enhance the education and reintegration of female victims of family conflicts. Women put to practice the livelihood skills they learned recently in the sewing of masks - a creative reaction to the Covid-19 pandemic.

FSD is working together directly with local entrepreneurs. We offer skills trainings in order to improve business prospects. Additionally, we present employment building activities that allow a larger part of the population to engage in a breadwinning activity.

Since only 1/3 of the population has access to clean drinking water, **FSD plans to drill more boreholes to grant wider access to water .**

PERSONAL HYGIENE

Only 1 out of 10 can access hygiene facilities. Especially during the Covid-19 pandemic, **FSD will continue building up hand washing stations in order to contain the spread of the virus**

DRINKING WATER
